

Your Trusted Partner in Thermal Remediation

EXPERIENCE • PERFORMANCE • TECHNOLOGIES

TERRATHERM
a Cascade Company

TerraTherm is the premier provider of thermal remediation solutions.

As the only company with decades of experience deploying all three heating technologies, we have a unique capability to honestly evaluate sites and design, install, and operate the safest and most effective thermal remediation systems to reliably achieve clean-up goals and increase site owner value.

**180
WORLDWIDE
PROJECTS
SUCCESSFULLY
COMPLETED**

At TerraTherm we offer all the primary thermal remediation heating technologies:

- Electrical Resistance Heating (ERH)
- Thermal Conduction Heating (TCH)
- Steam Enhanced Extraction (SEE)

Ensure your project's success by collaborating with a trusted partner who has a proven track record of safely delivering assured remedial results treating a wide range of contaminants:

- VOCs, BTEX, CVOCs, Naphthalenes, Chlorobenzenes
- PFAS, Dioxins, Mercury, PCBs, PAHs
- MGP Coal Tar, Creosote
- DNAPL, LNAPL
- SVOCs, Pesticides, TPH

ASK US how you can use thermal remediation to treat PFAS

At TerraTherm, we safely deliver the most cost-effective and technically appropriate solutions.

Our highly experienced team of thermal remediation professionals performs an unbiased evaluation of the specific characteristics of each site to select the best technology(ies) and provide the optimal solution to meet your remedial needs. Our in-house team includes more than 70 full-time employees including safety, project management, engineering, design, construction, and operations staff.

We build and maintain the largest and most comprehensive fleet of TCH, ERH, SEE, and extraction and treatment equipment of any thermal remediation vendor at our headquarters in Massachusetts:

- Over 1 acre of equipment storage space
- Dedicated team of equipment fabrication specialists
- Over \$4 Million invested in new capital equipment and materials in the last two years

SAFETY

For TerraTherm and our parent company Cascade, safety is not just a policy; it's a core value ingrained in every aspect of our operations. TerraTherm is an active participant in Cascade's world-class CORE™ Safety Program and we prioritize the health and safety of our employees, subcontractors and the public, above all, ensuring safety is never compromised for expediency or cost. Our comprehensive Health and Safety Program is thoroughly designed to not only comply with governmental regulations but also to exceed our client's specific health and safety requirements.
